

iGreen Systems & Technologies

Enterprise Software, IoT & Intelligent Systems

Client-facing capability overview

Who We Are

A trusted software and intelligent systems partner for organizations digitizing real-world operations.

Since 2008, iGreen Systems & Technologies has delivered connected platforms, cloud applications, automation systems, and enterprise software solutions across India and the USA.

18+

Years Experience

521+

Projects Delivered

232+

Clients Served

25

Specialists

Enterprise Software

The Problems We Solve

Helping organizations modernize operations, reduce friction, and build connected digital foundations.

Common Enterprise Challenges

 Disconnected systems limit visibility and slow decisions

 Build unified digital platforms

 Manual workflows increase effort and errors

 Connect devices, systems, and teams

 Lack of real-time visibility reduces operational control

 Automate monitoring, alerts, and reporting

 Legacy infrastructure slows transformation

 Deliver dashboards, integrations, and operational insights

 Scaling digital initiatives is difficult

 Create scalable digital foundations for growth

Solution Capabilities

End-to-end solutions that power digital operations, drive efficiency, and unlock real-world impact.

Enterprise Software Platforms

- Web applications
- Workflow systems
- Dashboards & analytics
- Role-based platforms

IoT & Intelligent Systems

- Asset monitoring
- Smart building solutions
- Predictive maintenance

Cloud, Mobile & Integrations

- Cloud architecture
- API integrations
- Mobile applications
- AWS / Azure / GCP delivery

CRM Systems

- Customer workflows
- Sales visibility
- Service coordination

ERP Systems

- Finance management
- Operations management
- Inventory control
- Enterprise process integration

Built with security, scalability, and performance at the core.

Bring Us Your Complex Idea. We Make It a Reality.

From concept to execution, we translate complexity into scalable real-world systems.

Where We Deliver Value

Experience across enterprise software, connected systems, and operational environments.

1

Smart Buildings & Facilities

Monitoring, automation, and intelligent operations

2

Industrial & Asset Operations

Connected assets, visibility, and performance insights

3

Workflow Digitization

Approvals, reporting, and process automation

4

Cloud & Mobile Platforms

Scalable applications, integrations, and delivery

5

CRM & ERP Modernization

Modern workflows, business systems, and connected operations

We work where business processes, digital systems, and real-world execution intersect.

Proof of Execution

Delivered projects, deployed platforms, and client relationships across digital and operational use cases.

80%

Reduction in processing time

Why iGreen

A practical, integration-first partner for enterprise software and intelligent systems.

1 End-to-end capability

From software and integrations to cloud and connected systems

2 Integration-first approach

Built to work across existing systems and new digital platforms

3 Real-world deployment experience

Proven in operational and enterprise environments

4 Scalable architecture

Designed for growth, resilience, and maintainability

5 Outcome-driven execution

Focused on measurable business value and real-world impact

Since
2008

India & USA
Delivery

521+
Projects Delivered

232+
Clients Served

Start with One Use Case. Scale with Confidence.

Enterprise software, IoT, CRM/ERP, and intelligent systems for real-world execution.

Assess

Understand needs, systems, and priorities

Pilot / MVP

Validate value with a focused initial use case

Build & Scale

Deploy with precision and grow with confidence

Let's explore one workflow,
one platform, or one operational use case.
